

LEARN WHEN TO TERMINATE IRRIGATION

ATTEND AN IRRIGATION TERMINATION TURNROW TALK

You've heard about irrigation tools that can help you save money and irrigate more efficiently; now you can see them in action.

Attend an upcoming Irrigation Termination Turnrow Talk sponsored by the Mississippi Soybean Promotion Board, Mississippi State University (MSU) Extension Service and stakeholder organizations of the Delta Sustainable Water Resources Task Force.

Mississippi State University (MSU) irrigation specialist Jason Krutz, Ph.D., and MSU soybean specialist Trent Irby, Ph.D., will show Mississippi soybean farmers how to determine the right time to end irrigation in their fields.

We will demonstrate how to determine when it is the right time to stop irrigating fields based on portable and permanent soil-moisture sensors and the plant's physiology.

Mark your calendar for Aug. 26 to attend an Irrigation Termination Turnrow Talk at the following locations. Call the local extension office for more information and directions.

AUGUST 26

9:00 a.m., **Tunica County**
Richie Bibb farm
Extension phone: 662-363-2911
